

Flowbird GO
Cloud-based, Off-street Parking Experience.

Park. Scan. Go.

Flowbird GO offers unique insights into your parking facility, delivering a simple yet dynamic solution with advanced results.

Whether it's a ticketed gated solution, or a ticketless barrier free parking solution using ANPR that scans number plates on entry and exit, Flowbird GO does it all.

This cloud-based solution, alleviates servers onsite, and is a real-time digital parking validation solution, with around the clock intercom voice call services here in Australia.

- ✓ Cost efficient
- ✓ Cloud managed parking rights
- ✓ 100% hosted by Flowbird
- ✓ User friendly design
- ✓ Easy to maintain
- ✓ Flexible & scalable
- ✓ Comprehensive data management

- ✓ Dynamic user management
- ✓ Built-in input/output barrier control
- ✓ Built-in LAN network for reliability and cost efficiency
- ✓ Secure device, data and system integration
- ✓ Customisable message screens at entry and exit – for your frequent customers, new visitors, and special guests
- ✓ Flexible and scalable – adaptable for all parking lots

Drivers payment process.

01

Entry Terminal

The driver checks-in at the entry of the carpark using one of the provided methods below:

- Print QR-code
- Enter phone number
- Swipe a credit/debit card
- Permit holder access

02

Pay-on-foot

Before returning to their vehicle, the user will pay for only the time used by visiting the pay-on-foot terminal. The pay-on-foot terminal can be equipped with cash, coin, credit card, or tap payment.

03

Exit Terminal

To exit the structure, the car stops at the exit kiosk. The user can pay in the lane or present their previous exit token:

- Printed QR-code
- Enter phone number
- Swipe a credit/debit card
- Permit holder access

One Platform. Endless Possibilities.

Flowbird GO Portal is a great tool to manage the parking sessions and create good relationships between the operator, and the motorist. The operator can handle and verify uncertain camera readings, monitor parking sessions, verify, and send invoices.

Lost Tickets

Flowbird GO supports lost ticket codes where drivers can use the pay-on-foot station or exit terminal to pay a lost ticket fee.

Frequent Parkers

Streamline monthly account management with our cloud-based portal that is accessible anytime, anywhere. Flowbird provides a complete permit solution to manage monthly parkers.

Digital Parking Validations

Your team sets up the validations in our back-office suite and provides the rights to merchants to distribute validations to their customers.

Mobility on demand.

Built with enhanced technology integrations, the Flowbird GO system offers unique insights into your parking facility, delivering a simple, yet dynamic solution with advanced results.

Fully cloud-based solution

No need for an on-site server.

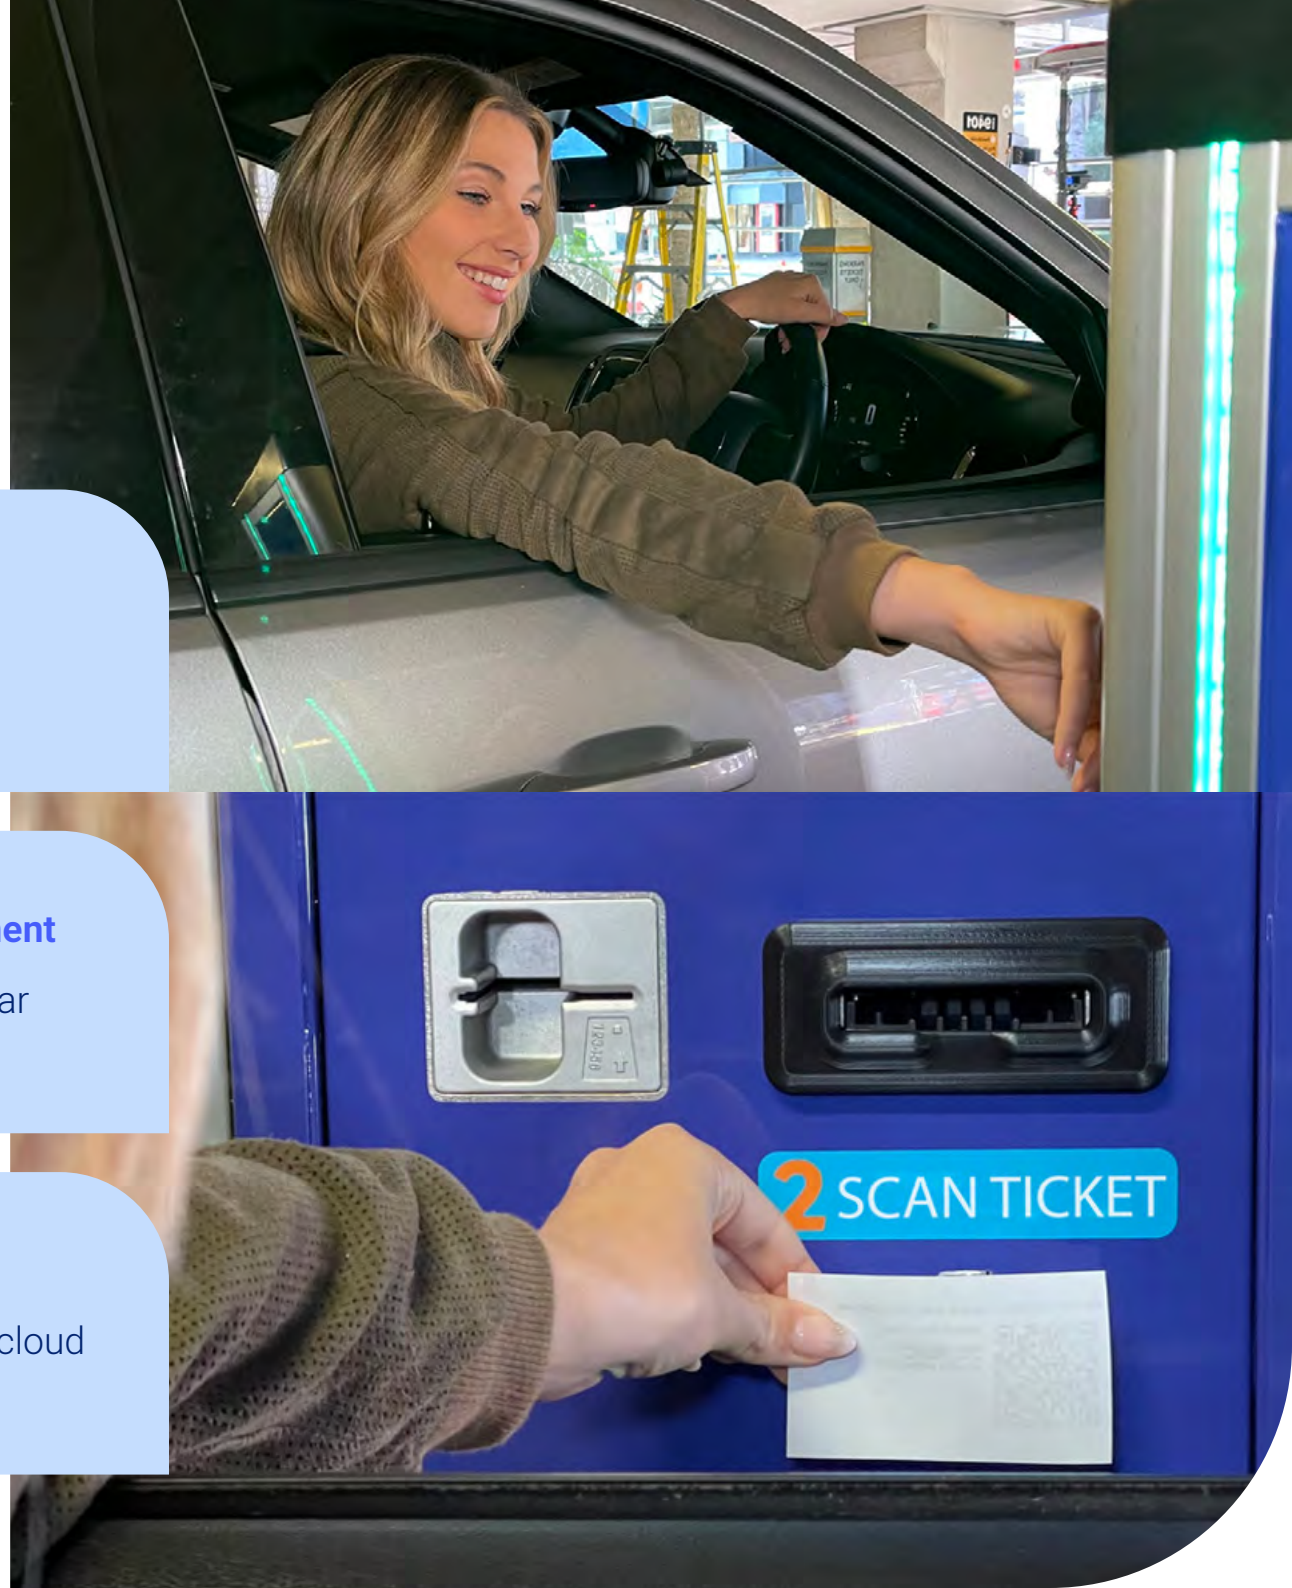

Maximises your return on investment

Save thousands compared to similar systems.

Dynamic QR code based solution

User's parking fee is tracked in the cloud by their unique QR code.

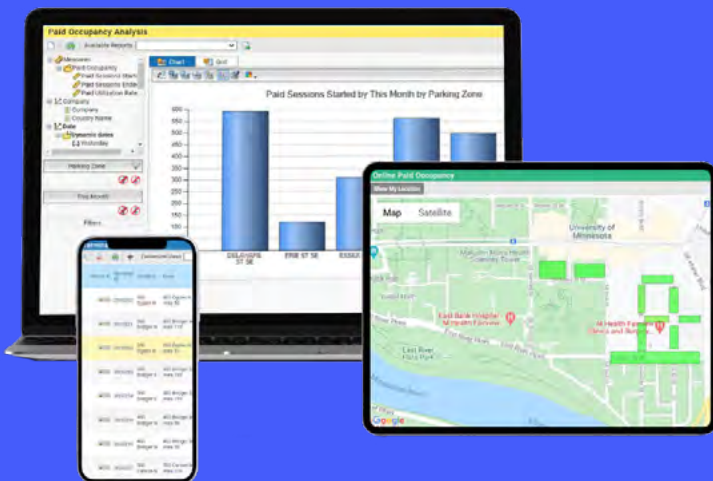

Data-Driven Operations.

Your operation runs in real time, so should your technology. The Flowbird GO back-office solution allows for in-depth data analysis to better understand the needs of your city.

Generate reports with precision

- ✓ Provide summary reports of the parking facility activity with detailed financial information
- ✓ Statistical reports linked to operational performance such as occupancy level, amounts paid and parking times, and distribution of payment methods
- ✓ Alarm statistics and alarm logs

360 Control

The Flowbird GO back-office was designed to be powerful but intuitive – you will be a master in minutes!

All payment transactions are stored in a central cloud-based location – your complete data management solution. The reporting module offers advanced summary detailed reports so you can make operational decisions based on your environment and customer behaviors.
